WHO WE ARE

The EKS InTec GmbH is a partner in the field of development, construction and software as well as virtual commissioning of simple to complex production plants and special machines for the mobility industry and its system partners.

We realize the virtual commissioning of complete production plants by means of the in-house development RF::Suite. This enables us to identify problem areas long before the real plants are available and to optimize processes and plants.

EKS InTec GmbH is an independently acting unit within an international group of companies.

WHAT WE OFFER

With us the WE is capitalized. Flat hirachia ensure that you participate in shaping and not just nod off. WE are a growing company with the goal of shaping the future. Therefore, flexible working hours, flexitime and a casual working atmosphere are no foreign words for us.

In our new offices you can take on project responsibility and work creatively with your international colleagues to implement the tasks assigned to you.

The neighbouring fitness studio is available to you free of charge for breaks for reflection. With fresh fruit and hot or cold drinks you can relax in our recreation areas. Regular team events, our summer party or go-carting are also available.
